Description:
The new VB™ series was designed from the ground up for the serious professional bass player. Voiced for strong bass with a smooth harmonic tone, the versatility and performance of the VB™ 215 encourages use with any fine bass amp head.

The VB™ 215 is constructed using a premium grade of 12 mm Baltic Birch plywood with extensive internal bracing, and is covered with durable polyurethane HammerHead™ finish. The cabinet includes a black cloth grille with a wooden plywood frame for that warm musical "tone". Tilting the cabinet back engages heavy-duty casters on the rear back edge to provide easy transport, along with the convenience of a pull bar handle on the top rear edge. Skid rails on the back allow the cabinet to be slide along it's back for loading or unloading ease.

The two 15" Black Widow® bass woofers provide a classic bass tone, with excellent power handling and punch. The vented cabinet provides strong powerful bass, with every note propelled forward into the mix. Inputs include two 1/4" input phone jacks, and one 4-pin twist-lock connector, for maximum flexibility.

With a nominal impedance of 4 ohms, and a power handling of 1400 watts program and 2800 watts peak, the VB™ 215 can be used in conjunction with almost any sized bass amp head. Be sure to check the amplifier specifications to verify the minimum impedance rating of the amp used to power the VB™ 215.
