c. Thickness at 1st Fret: .807" (20.5mm)

d. Thickness at 12th Fret: .886" (22.5mm)

Radius: 15.75"

## BRIDGE PICKUP

### Peavey® USA Design

**Construction:** Humbucking, Designed specifically for the AT-200™ Bridge position

**Magnet Type:** Calibrated ceramic magnet, epoxy potted coils, solid covers

**Description:** High output, harmonically positioned humbucking, dual coil pickup, 16k dc. Terminated and wound for low noise operation. 2 conductor shielded hookup wire. Alnico 5 magnet calibrated for bridge position. Coils frequency calibrated and metered to enhance midrange and high end response with increased output for cutting solo work and tight low end response. High output without harshness.

## NECK PICKUP

### Peavey USA Design

**Construction:** Humbucking, Designed specifically for the AT-200 Neck position

**Magnet Type:** Calibrated ceramic magnet, epoxy potted coils, solid covers

**Description:** Specifically designed for neck position, 12k dc. Terminated and wound for low noise operation. 2 conductor shielded hookup wire. Medium high output. Harmonically positioned to enhance harmonics, presence and attack in neck position. Metered coil winding and matched magnetic structure allow increased dynamic range without muddiness at higher volume.

## AVAILABLE CASES/BAGS

- Peavey Part #00444840 Rectangular Guitar Case
- Peavey Part #00478950 Molded Electric Guitar Case
- Peavey Part #00722780 Nylon Guitar Bag

## AT200-B Breakout Box--available separately

With the AT-200B\*, you can greatly enhance the experience of playing your AT-200 guitar. No need for batteries the AT-200B remotely powers the AT-200, ensuring no problems with dead batteries! The included 8-pin DIN cable also carries the guitar's output back down to the box, where a 1/4" output allows you to direct your signal to your effects or amplifier. In addition, the MIDI jacks on the AT-200B connect the AT-200 guitar to the world of MIDI control! Software upgrade packages available from Antares will offer a myriad of great new features for the AT-200, all of which can be controlled via MIDI. Please visit <http://guitar.auto-tune.com> for more information about software upgrades. By registering your AT-200 at the Antares' Auto-Tune for Guitar web site <http://guitar.auto-tune.com>, you become eligible to download any future firmware updates into your guitar using the AT-200B Breakout Box and a MIDI interface for your computer.
