

SPECIFICATIONS 6505° Slant / 6505 Straight

Designed to the exacting specifications of our original 1992 version with a few basic updates that have been requested by countless artists over the years. The all-new Sheffield 1230+ speakers harken back to the earliest original Sheffield design that initially sealed the deal back in 1991. These are loaded in a biplanar-aligned, infinite baffle, closed-back cabinet. Dual 1/4" jacks with Stereo/Mono selector. 300W(rms) power handling. Solid Birch plywood construction, recessed handles, and heavy-duty pop-out casters. 16 Ohms mono, 8 Ohms per side stereo.

The 6505 series amplifiers and enclosures are the result of extensive research and development to produce the ultimate products for guitarists. With the 6505-1992 Original, 6505 II, and 6505MH heads, you'll experience super rock crunch, harmonic-rich sustain, and screaming drive like you've never heard before. Production models are identical to those used by countless legendary artists for recording, as well as on tour.

Features

- 4 - 12" Sheffield 1230+ speakers
- 300W handling
- Dual 1/4" jacks
- Stereo/Mono switch
- High-density Birch plywood construction
- Recessed handles
- Heavy-duty pop-out casters
