CONTROLS

BRIDGE PICKUP

Peavey® USA Design VFL Humbucking

Construction: Internally active, low impedance, extended frequency response

Magnet Type: Ceramic, extended magnetic window **Description:** Internally active, 18 volt powered, frequency balanced for bridge position. Low impedance design allows for noise free operation, clarity and improved dynamics. Unique VFL design enhances dynamics and sensitivity for all playing styles. Wide magnetic window allows full string vibration and reduced magnetic damping. Adjustable height and angle. Output 1v-4.5v.
